Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 11-20 allowed.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 rejected under 35 U.S.C. 103(a) as being unpatentable over Yomomota, (JP 3-232274) in view of Kim (6,052,169)

Regarding Claims 1-10, Yamamoto et al. in Figs. 27-33 disclose a liquid crystal display device with multiple LCD cells, plurality of gate wires connected or liquid crystal cells, and plurality of pads wires connected or plurality of pads. Plurality of pad wirings that extend from the gate wirings are at a straight angle. Furthermore, Fig. 28 shows the manufacturing steps of making such liquid crystal display device. Yamamoto fails to disclose the required pad and driving/gate/data/signal line relationship. However, Kim discloses a liquid crystal display device having an equipotential electrode structure where in Figs. 1-4, the required pad and driving/gate/data/signal line relationship configuration is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required pad and driving/gate/data/signal line relationship in Yamamoto et al. as taught by Kim in order to have a liquid crystal display device with increased reliability.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The examiner can normally be reached on M - F 8:00 - 5:00.
